Teachers are the one and only people who save nations. The new generation will be your devotion

The Founder of Turkish Republic.
Choosing the university is like deciding to depart on an adventurous journey for an important period of a student's life because this decision will affect his/her life permanently. Karabuk University assures its students not only a good academic quality but also a good quality of life, thanks to premises and services that are technologically advanced and in perfect harmony with the natural and historical surroundings.

Karabuk University has been awarded with Diploma Supplement (DS) by the European Commission.
On behalf of the academic staff of our university, I invite you to join us to strengthen the flexibility of learning, to create opportunities for your intellectual and professional development.

Internationalization is one of our major priorities so our university has signed agreements with many universities from nearly 25 countries under Erasmus Program to increase the participation of students in workforce and their education levels as well as providing opportunities to improve their capacities related to the knowledge about their jobs.

We will be delighted if you decide to come to Karabuk University for your studies and we try to do our best to integrate our international students into the new environment.

I hope that being a student of Karabuk University will prove an unforgettable experience.

We look forward to welcoming you in Karabuk University...

Prof.Dr. Burhanettin UYSAL
Rector
Overview of Karabük

Location

The province of Karabuk is located in the Western Black Sea Region, and is a tourism paradise with its historical Safranbolu houses and ancient cities.

Karabuk is also close to Amasra which is a small port town. The town is today much appreciated for is its beaches and natural setting.

Karabuk carries the rightful honor of representing the industrialization process in the history of the Turkish Nation. Karabuk province was chosen for the foundation of the first integrated iron steel facility of Turkey.

Reaching to the province of Karabuk is possible via highway and railway. The nearest airport to the province is Ankara Esenboğa Airport (240 km)

Area: 1.376 km²

Highway: Reaching to the province of Karabuk is possible via Ankara–İstanbul highway. You should take the road separated in Gerede turn and the city is 80 km away from the highway. The bus station is located in the city center.

Railway: It is possible to reach Zonguldak and Ankara Provinces from Karabuk by railway.

Safranbolu Houses

The most important element, which brought Safranbolu forward in our country and in the world at the scope of the culture tourism, is the Safranbolu houses constructed in the style of the traditional Turkish architecture. There are approximately 2000 traditional Turkish houses at the district center constructed at the beginning of 18th and 19th century.

Ancient Cities

As a result of the archeological excavations in the Karabuk
province the ruins of the ancient Hadrianopolis city had been discovered inside the borders of the Eskipazar district was assumed to be founded in BC 64, in the Roman civilization period.

**Parks and Resorts**

Göktepe Nature Park: This park is located in the Yenice District. It has advantages like natural beauties, suitable climate and clean air and convenient reaching. The plateau is suitable for sportive activities, camping and caravan tourism.

Gökpınar Relaxation resort: This resort is located inside the poplar forest region of Yenice district, on a mountain peak called as Gökpınar plateau.

Çetiören Promenade Place: This promenade place is located at 10 km distance to the Eskipazar district. The area has rich fauna and flora and wild life. The area has unique beauties.

The music and oiled wrestling festival is arranged at the second weekend of August each year.

Eğriova Promenade Place: This promenade place is located at 25 km distance to Eskipazar district in the locality of Eğriova with 12,000 m² surface area and an artificial lake with 5 m depth. It is a suitable place for trekking and camping purposes.
Overview of Karabük

Eflani locality: This area has broad plains and plantation.

Caves and Canyons

Bulak (Mencilis) Cave: This cave is located in Bulak village. With its 6.5 km length, it is the 4th largest cave of our country. The cave is a natural wonder with its stalagmites, stalactite travertine, small lakes and underground river.

Other various caves inside the city borders are the caves located in the Sipahiler village reached via 61 stairs and the Hizar cave located inside the borders of Safranbolu district.

Incekaya Aqueduct: This aqueduct is about 116 meters.

Sporting Activities

Hunting and Line Fishing: As the 60% of the Karabuk Province is covered with forests, the city has a suitable medium for hunting.

Trekking: The geographic structure of the province is covered with mountains and therefore it host numerous natural trekking areas.

Neighborhood

Amasra is a charming, relatively undeveloped fishing town built on a fortified peninsula that just out into the Black Sea. Founded in the 12th century BC, the Byzantines named Amasra Seasamos Amastris after the Persian Princess Amastris. Amasra was a significant trading port during the Byzantine Empire, but slowly lost its importance to other
Overview of Karabük

Byzantines. Inside the walls of the fort is a Turkish bath and Byzantine church that is now the Fatih Mosque.

Amasra’s Archaeological Museum houses local artifacts from Hellenistic through Ottoman periods, including an interesting ethnographic collection.

Amasra boasts plenty of activities for outdoor enthusiasts. Off the peninsula are two islands – one rowing distance away, the other connected to the peninsula by a Roman vault used as a bridge, and both providing great views of Amasra and the old citadel. Between Bartin and Amasra are colorful caves that can be explored. The east side of town has nice sandy swimming beaches, the bay protecting bathers from the Black Sea waves. Amasra is known for its wood carvings and you can find hand crafted gifts ranging from kitchen utensils to figurines in Çekiciler Street. In addition, you can find beautifully embroidered textiles for your home, and an interesting array of toys made from seashells, hazelnut shells and eye fish bones. If you are visiting Safranbolu, Amasra is a nice village to continue onto as it’s just 90 km away. You can also reach Amasra by bus from Ankara and Istanbul.

The workweek in Turkey runs from Monday to Friday. Banks, government offices and majority of corporate offices open at 9 AM and close at 5 PM.

There are two types of public holiday in Turkey: Those fall on the same day each year; and the religious festivals which change according to the lunar calendar and, therefore, fall on different dates each year. 1 January, 23 April, 1 May, 30 August, 28 & 29 October.

Visas are easily obtained upon arrival to the airport and are required for citizens of most countries.

As with many Mediterranean nations Turkish food is very healthy, fresh and enjoyable.

Tap water is chlorinated and, therefore, safe to drink. However, it is recommended that you consume bottled water, which is readily and cheaply available.

Turkey has three GSM operators, with all of them offering 3G services and almost over 95% coverage over the country. Internet service is available all around the country.

+90
**Political System**

Turkey is a parliamentary representative democracy. Since its foundation as a republic in 1923, Turkey has developed a strong tradition of secularism.

Executive power is exercised by the Prime Minister and the Council of Ministers which make up the government, while the legislative power is vested in the unicameral parliament, the Grand National Assembly of Turkey.

The prime minister is elected by the parliament through a vote of confidence in the government and is most often the head of the party having the most seats in parliament. Universal suffrage for both sexes has been applied throughout Turkey since 1933, and every Turkish citizen who has turned 18 years of age has the right to vote.

**Religion**

Turkey is a secular state with no official state religion; the Turkish Constitution provides for freedom of religion and conscience.

According to 2009 data on the world's Muslim populations, 71.1 million people in Turkey are Muslims or 98% of the total population.

There are less than 100,000 minorities which follow other religions, mainly Christians, mostly Armenian Apostolic, Assyrian Church of the East and Greek Orthodox (64,000 people) and Jews, mainly Sephardic (26,000 people).

Turkey as a Eurasian country.

Turkey is the world's 37th-largest country in terms of area. The country is surrounded by seas on three sides: the Aegean Sea to the west, the Black Sea to the north and the Mediterranean Sea to the south and also contains the Sea of Marmara in the northwest.

The territory of Turkey is more than 1,600 kilometers long and
Overview of Turkey

800 km wide. The European section of Turkey, Eastern Thrace, forms the borders of Turkey with Greece and Bulgaria.

Eastern Turkey has a more mountainous landscape and is home to the sources of rivers such as the Euphrates, Tigris and Aras, and contains Lake Van and Mount Ararat, Turkey's highest point at 5,165 meters.

Geography

Turkey is divided into seven census regions: Marmara, Aegean, Black Sea, Central Anatolia, Eastern Anatolia, Southeastern Anatolia and the Mediterranean.

The coastal areas of Turkey bordering the Aegean Sea and the Mediterranean Sea have a temperate Mediterranean climate, with hot, dry summers and mild to cool, wet winters.

The coastal areas of Turkey bordering the Black Sea have a temperate Oceanic climate with warm, wet summers and cool to cold, wet winters.

The coastal areas of Turkey bordering the Sea of Marmara including Istanbul, which connects the Aegean Sea and the Black Sea have a transitional climate between a temperate Mediterranean climate and a temperate Oceanic climate with warm to hot, moderately dry summers and cool to cold, wet winters.

Climate

Snow does occur on the coastal areas of the Sea of Marmara and the Black Sea almost every winter, but it usually lies no more than a few days. Snow on the other hand is rare in the coastal areas of the Aegean Sea and very rare in the coastal areas of the Mediterranean Sea.

Istanbul is truly a world city, a city which everyone should visit at least once in their lifetime. It is an enchanting blend of Eastern and Western culture, a vibrant, modern city, with a unique identity. Its rich past coexists alongside its youthful exuberance. Although no longer the capital of Turkey, Istanbul
Istanbul in Brief

Marmara separating Europe from Asia. Istanbul has a foot in each, celebrating the best of both heritages. As Byzantium, Constantinople and finally, Istanbul, it has been the capital of their Empires, each leaving their mark in the form of stunning palaces, castles, mosques, churches and monuments. The legacy of its past can be seen on every turn of the modern city.

The layout of Istanbul can seem confusing at first. The Bosphorus divides the city into the European and Asian sides, linked by two magnificent bridges, spanning the continents, the first of which was opened in 1973 to celebrate the 50th anniversary of the Republic.

Most visitors to the city, staying for a few days, will have little reason to visit the Asian side, except for as part of a Bosphorus tour, on a boat which zigzags from side to side, to take in the best of each.

The European side, however, is also divided in two by the Golden Horn of Haliç, which roughly divides the historic part of old Istanbul, encompassing the eras of, Sultanahmet and Laleli, from the modern city. It is crossed by a number of bridges, the most famous of which is the pontoon, the Galata Bridge. Most visitors on short city breaks stay in the old town.
as the vast majority of the sites which they will be visiting are in this area. Istanbul’s most famous sites – The Blue Mosque, Aya Sofya (Hegia Sobhia), Topkapı Sarayı (Place) and the Grand Bazaar (Kapali Çarşı) – are all within a 30 minute walk of each other. It is easy to get around on foot or by making use of the tram, which provides a regular service on the pedestrianised main street. In terms of accommodation, there are now a number of boutique hotels in the area of Sultanahmet, many of which are restored Ottoman wooden mansions.

These are ideal for those who really want to savor the authentic atmosphere of the Old Town. Those on a budget may want to consider the more modern and competitively priced hotels of the Laleli district, although this area is much busier.

Some of Istanbul’s finest vistas are to be seen from the Bosphorus. If you have time it is well worth spending at least half a day viewing the site and savoring the atmosphere. You can take a guided tour on a small boat, or Turkish Maritime Lines (TDİ) runs a good value public ferry service which leaves two or three times a day and does the full round trip as far as Anadolu Kavağı, the nearest village to the Black Sea on the

Asian side, and back to Eminönü. It is a charming place, known for its fish restaurants, and the walk up to the ruined fortress overlooking the village, is well worth it for the stunning views. As you head towards the Black Sea you will pass the Dolmabahçe Place, Beylerbeyi Place and the 15th century fortresses built by Mehmet II, Rumeli Hisari and Anadolu Hisari. Also look out for the stunning wooden Ottoman mansions, many of which have been renovated and form some of the city’s most desirable residences.

The Bosphorus

Even if you don’t have time for a Bosphorus trip just quick trip from Eminönü to the Asian shores and back – to Üsküdar for example just to admire the views of the old town.

The history of Ankara and its surroundings stretches back to the Hatti civilization of the Bronze Age. Two thousand years
known as the Galatians made Ankara their capital city. The name Ankara comes from the word 'Ancyra', which means 'anchor.' Ankara gained prominence under the leadership of Ataturk during the national resistance which followed World War I. It was declared the capital of the new Turkish Republic on October 13th 1923 when the National War of

Ankara in Brief

Independence freed Turkey from foreign prominent parts of the city is Anıtkabir, the magnificent mausoleum constructed to commemorate Ataturk.

This structure, which was completed in 1953, is a synthesis of antique and modern architectural themes, and proves the elegance and strength of Turkish architecture. The Aladdin Mosque found inside its walls is still one of the best example of
Although Karabuk University was established in 2007, it's been operational as a higher education establishment for quite some time as part of the Zonguldak Karaelmas University previously. One of the aims of our University is to increase participation of population in workforce and its education level as well as provide opportunities to working individuals to enable them to improve their capacities related to accessing knowledge about their jobs.

One of Higher Schools of Vocational Education and Faculty of Fine Arts and Design are in Safranbolu, 8 km away from Karabuk and in “the List of World Heritage Cities” by the UNESCO Safranbolu is famous for its historical wooden houses many of which are under legal protection and used as pensions.

In Karabuk University, one academic year is divided into two semesters, Autumn and Spring. The undergraduate degrees are conducted for 8 semesters and associate degrees are conducted for 4 semesters in vocational schools. The bachelor’s degree is given to students who have completed the 8 semesters successfully. The institutes offer postgraduate courses and degrees that lead to master’s or doctorate degrees.

In Karabuk University every freshman student is assigned to an advisor who guides students about the subjects related with education and training and other problems.

Course grades and graduation status are determined according to credit system. There are three main types of courses such as must, elective and pre-requisite courses. For each course, students have to take at least one midterm and one final exam at the end of the semesters.

Students are admitted to degree programs by Selection and Placement of Students in Higher Education Institution. As for the post graduate programs, they are accepted after they have been qualified in some exams in their in their fields and language proficiency exams.

European students can apply to Karabuk University as exchange students, provided that their university has a
bilateral agreement with Karabük University applicable for the departments or programs they are registered.

**Language of Instruction**

The medium of instruction at Karabük University is Turkish but a year of English preparatory class is compulsory if the students' English level is not sufficient.

**Method of Assessment**

A semester includes 16 weeks and 8th week of each term is spared for mid-term exams. Scoring of exam papers, quizzes, homework and practical works is made out of 100. The final score is calculated as the sum of 40% and 60% of the scores obtained from the mid-term and final exam respectively. Then based on the following table, the final score is converted into letter grades.

<table>

</table>

Attendance to courses and laboratories is compulsory but students have the right to miss 30% of theoretical courses and 20% of laboratory and practical works.

If the score of a student's final exam is 50 or less, the student fails regardless of the score obtained from the mid-term exam. To have a pass from a course, students are required to have a local letter grade of at least C. Otherwise the course needs be repeated. Unsuccessful students are given a second chance to get a score which is enough for them to pass 2 weeks after the finals week.
Teaching System

Lectures, seminars, practices, group works and independent studies are the forms of teaching being carried out at Karabük University.

Academic Recognition

Karabük University ensures recognition of credits received in another higher education institution with which it has bilateral agreements on the condition that the courses taken by the students are pre-agreed on by the departmental committee. So the students who wish to study abroad as Erasmus Students are asked to get their learning agreements approved by their departments before the application to the host institution. These learning agreements assure the recognition and incorporation of the credits into the student's transcript of records.

Internationalization

Karabük University's International Relations office was established to manage and develop international institutional connections, staff and student exchanges and research programs. It has undertaken projects both at the graduate and undergraduate levels and staff mobility studies in Leonardo da Vinci and Erasmus Programmes. It is crucial that Karabük University involve in cooperative activities with universities having EUC to improve and innovate the quality of education. Major objective of the university is to become an integrated institution with the international curriculum in accordance with the principles of ECTS. Karabük University has been awarded with an Extended Erasmus Charter since 2008 and the Erasmus ID is: TR KARABUK01.

Webometrics

According to The "Webometrics Ranking of World Universities’’ an initiative of the Cybermetrics Lab, we have increased nearly 1000 rows in university web ranking within a year.
Laboratories, Libraries and Computing Services

The faculties and the vocational schools have their own libraries and computer laboratories. In these laboratories, computer courses and the internet service are provided for all the students of the university.

Karabük University Mini – Zoo

In on-campus mini-zoo there are several kinds of animal species including ducks, geese, peacocks, monkeys, rabbits, pigeons, ostriches, pheasants, swans and many kinds of birds.

Student Life

Students at Karabük University participate in the various activities such as recreational sport clubs, cultural clubs, Chess club, folk dances club, drama clubs, dancing clubs, photograph clubs, table tennis additionally in-door sports (basketball, volleyball). Students can find ways of entertainment to meet their needs by joining one of these clubs. The university has a very active Student Council. Throughout the year students make activities including exhibitions, concerts, etc.
Accommodation

There is a public dormitory on campus run by The Higher Education Credit and Accommodation Institution and can accommodate nearly 1000 students. State owned dormitory (YURT KUR) in the Campus is a possibility whose accommodation price is relatively cheaper than many European countries. The dormitory has its laundry and dining hall.

Apart from the public dormitory, students have the chance to live in Student's Houses which are quite near to the campus and about 10 minutes away on foot. Students share the room with a roommate and each room includes private bathroom, kitchen, personal desks, wardrobes and chest of drawers.

There are also some facilities for students such as laundry room, dining hall and television rooms.

Students who want to live off campus can stay in a flat on their own or may share their flat with a friend.

There are also several private dormitories as well as the public ones.

Transportation

Public transport is convenient and cheap in Karabuk. Minibuses and buses provide regular services both from Karabuk and Safranbolu to the campus (75 cents.)
Faculties & Departments of Karabük University

Faculty of Technical Education

Faculty of Technical Education aims to encourage scientific research and achieve academic excellence by providing outstanding instruction in technology. It consists of 5 Departments for education: Metallurgy Education, Mechanical Education, Electronic & Computer Education, Furniture Education and Pedagogic Department. The programs in Mechanical Education Department are Manufacturing, Design and Machine Building, Automotive, HVAC. The programs in Metal Education Department are Metal Works and Casting. Electronic and Computer Systems Departments teachers in Computer Systems program. In Graduate School of Natural and Applied Sciences, the divisions of Mechanical, Metal Furniture and Decoration have Master of Science programs. The faculty has about 100 full-time academic staff, who instructs more than 3000 undergraduate students. Faculty of Technical Education offers a current curriculum that incorporates the fundamental principles as well as the latest discoveries in the major scientific disciplines.

Fethi Toker Fine Arts and Design Faculty

Fethi Toker Fine Arts And Design Faculty was founded in 2002 within Zonguldak Karaelmas University and it joined to Karabük University in 2007. There are four departments; namely, Architecture, Painting, Music, and Sculpture. The faculty places a strong emphasis on teaching and learning as well as fostering research activity in fine art, encouraging students to become involved with exhibitions and gallery activities and also aims to prepare young experts to approach the complex and demanding issues of architecture and design in an informed, creative and responsible manner in the context of our time.

Faculty of Science and Letters

One of the main principles of the modern education is to train students who can access to, understand analyze and synthesis the information. And whatever is taught at university, the information must be based on social and scientific knowledge.
With this purpose, Faculty of Science and Letters began its educations in 2007 – 2008 academic years in Physics and Chemistry Departments. From the beginning of 2009 – 2010 academic year, Biology, English Language and Literature, History of Arts, History, Mathematics, Archaeology and Psychology departments are also available.

**Faculty of Engineering**

Faculty of Engineering begun its education in 2008-2009 academic year with the purpose of providing the modern education to is students which will enable them to carry out high quality engineering work. At first, there were Mechanical Engineering and Metallurgical & Materials Eng. Departments. But from the beginning of 2009-2010 academic year, Computer Eng., Industrial Eng., Automotive Eng., Electric – Electronic, Mechanics and Chemistry departments are also available within the faculty.

**Faculty of Economics & Administrative Sciences**

Faculty of Economics and Administrative Sciences has four departments; Economics, Business Administration, Public Administration and International Relations. The degree programs aim to provide students with a general background in their specialization areas and equip them with tools of economic and administrative sciences for future professional life.

Double Major Program

A double major program enables students to study at different departments at the same time. It is completed in less time than it would take to get them separately. The two degrees might be in different subjects which are partly related to students major program. They take 4-5 years to complete instead of 7-8 years to graduate from separate majors.
International Relations

Karabuk University has been in close relations with EU universities since it was established. It has more than 60 agreements with universities from 20 different countries.
